

*Embassy of the United States of America
Manila, Philippines*

DNA Testing Option to Establish Parentage *General Information and Procedures*

The Embassy accepts the results of DNA testing to establish parentage. The U.S. Department of State requires DNA tests to be processed by a laboratory that is accredited by the American Association of Blood Banks (AABB). If the parents of a child wish to submit DNA test results as evidence to support the application for a derivative citizenship, including ‘Consular Report of Birth Abroad’, they should advise a consular officer. All costs and related expenses (such as doctor’s fees and the cost of transmitting testing materials and samples) must be borne exclusively by the applicant.

The testing option is normally offered to applicants who have tried, but have been unable, to meet the legal requirement of establishing a biological relationship (filiation) on which nationality may be based.

The Embassy does not “order” DNA tests. Testing *is strictly voluntary*, even in questionable cases where parentage evidence is unavailable or unsatisfactory.

Not all cases can be resolved by DNA testing. In cases where the lack of required physical presence in the U.S. by the transmitting parent prior to applicant’s birth or lack of legitimation means that filiation is irrelevant, *DNA testing will NOT be offered to establish parentage.*

The Embassy prefers the collection of DNA by buccal (cheek or mouth cavity) swab. For collection other than by buccal swab, advance approval from the State Department is needed, adding more time to the process.

Procedures: DNA Specimen Collection

(This procedure applies only to individuals who will be tested either in the Philippines or in the United States. When a person is located outside the Philippines or the United States, the DNA kit should be sent to the Consular Section of the U.S. Embassy in that country).

1. The consular officer reviews the case and recommends DNA testing, if necessary, to resolve filiation.
2. The consular officer or local staff provides information sheet – “DNA Testing Option to Establish Parentage - General Information and Procedures” to applicant and advises the applicant to submit two additional passport sized photos (for each person having the DNA specimen collection) to be used in DNA-related process. **The additional photos should be submitted to the Embassy within five working days from the date the DNA testing was recommended and before the DNA specimen collection appointment date.**

Names of AABB accredited labs can be found on

http://www.aabb.org/Content/Accreditation/Parentage_Testing_Accreditation_Program/AABBAccredited_Parentage_Testing_Laboratories. The AABB is located at 8101

Glenbrook Road, Bethesda, MD 20814-2749. The AABB can be reached by telephone at

(301) 907-6977 or by fax at (301) 907-6895. The AABB's email address is aabb@aabb.org.

3. The applicant must select a testing facility from the AABB list found in the website, make arrangements for payment and shipment, and request the necessary number of kits be sent in their name to the following address:

**U.S. Embassy
Consular Section - FPU
1201 Roxas Blvd., Ermita
1000 Manila Philippines
Attn: DNA-ACS**

4. When testing kits arrive at the Embassy, the Embassy will notify St. Luke's Medical Center Extension Clinic in Manila of their arrival. St. Luke's is the only medical facility in the Philippines identified by the Embassy to collect DNA specimen for citizenship purposes.
5. St. Luke's will contact the applicant to set up an appointment for the DNA specimen collection, which will be conducted at the Embassy.
6. On the collection appointment date:
 - a. Applicant proceeds to St. Luke's to pay the collection fee of **1,500 pesos** per person in **cash**.
 - b. After paying at St. Luke's, the applicant then proceeds to the Immigrant Visa waiting area, where the specimen collection will be conducted.
 - c. All parties having a DNA specimen collection need to bring appropriate ID to the collection appointment. Adults should bring a passport or valid government-issued ID and school aged children should bring a school-issued ID; a copy of the birth certificate will be provided for non-school aged children.
 - d. DNA specimen will be collected by St. Luke's medical technologist and witnessed by an American officer (at the collection area inside the Embassy).
 - e. DNA test kits in sealed envelopes are then shipped back to the AABB-accredited laboratory for interpretation/matching.
7. The AABB-accredited laboratory will send the test results directly to the Embassy's Consular Section.
8. Upon receipt of the results, the Embassy will take appropriate action on the application, and notify the applicant. Please note that in accordance with Department of State's guidelines, the Embassy cannot give copies of DNA test results directly to applicants or other parties without express consent of the Department of State. Applicants should inquire with the selected laboratory about receiving a copy of the results directly.

Contact Information: The Citizenship and Passport Unit of the U.S. Embassy can be contacted at (632) 301-2532 between 2:00 p.m. and 4:00 p.m., Monday through Friday, except on American and Philippine holidays. *E-mail:* ACSinfomanila@state.gov.
